

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. ## RUBBER HORSE SHOE PADS.

PATENTED

Nov. 19, 1876.

They give a firm, even and natural bearing over the Sole and Frog of the Foot. They prevent Balling up with the Snow, and are the best now in use for Corns, Quarter-cracks, and other troubles which arise from the old method of Shoeing, which gives a bearing only on the outside shell. The bottom or part of the Pad next the hoof is cloth, to prevent drawing or otherwise injuring the foot.

For reference I would name the following persons who are now using my Pads — Andrew Ward, of the firm of N. Ward & Co.; Lewis Whitaker, Norfolk Avenue, Lewis Hall, Livery Stable, Upham's Corner; David F. Grant, Blue Hill Avenue, Dorchester; George Jones & Co., Harrison Square; Dennis Thompson, Dudley Street, Boston Highlands; D. F. Hall, 34 Charles Street.

Applied by the Patentee and Owner at his Horse Shoeing Establishment.

Manufacturers of the Best

## PURE WHITE LEAD

EVER MADE IN THIS COUNTRY.

Their Mills are under the superintendence of Mr. D. G. BATCHELDER, whose reputation as a Lead Manufacturer has long since been well established throughout New-England and New York; and his WHITE LEAD stands unrivalled in this country.

The Salem Lead Company's Lead can be found for sale by the first-class Drug, Paint or Hardware dealers throughout New England, and by many in New York, Pennsylvania, and also in the Southern States.

Its uniform Purity and Brilliant Whiteness are fully appreciated wherever it is used, and these qualities in an eminent degree are achieving for it a success and demand hitherto unprecedented in the Paint trade.

This WHITE LEAD, owing to the great care used in the selection of the material from which it is made, and also in the grinding of the same, is said to wear longer and handsomer, and to present a harder surface to the action of the weather, than most of the Leads now in use.

**Its Perfect Purity is Warranted in all cases.**

*Please see that all Packages are marked SALEM LEAD CO.*

5-8 in. wide, for Weighting Window Shade Sticks.

8 in. wide and 3 and 6 lbs. to the square foot, for Plumbers' use.

The convenience and economy of this form of SHEET LEAD has already brought it into universal favor, and promises to supersede for the uses above named the Wide Rolls of Sheet Lead.

## **Chocolate, Broma, and Cocoa Preparations.**

An analysis made by Baron Liebig, the famous German chemist, shows that Cocoa and Chocolates are greatly superior to tea or coffee in all the properties which produce a healthy state of the body, and consequently of the mind. Coffee and tea are stimulants which often act injuriously; Cocoa and Chocolate are food which produces blood and cellular tissue. In its nutritive constituents, Cocoa resembles beef; as an article of diet it exceeds in value milk and wheaten flour. It contains every ingredient necessary to the growth and sustenance of the body. It is universally recommended by physicians as useful to invalids and persons recovering from disease.

Frequent analyses have been made under the direction of Boards of Health and Sanitary Associations in our large cities, to determine the purity of Chocolate and Cocoa Preparations sold in this country. In every instance the articles manufactured by **WALTER BAKER & CO.** have been reported as entirely pure and free from the admixture of deleterious substances.
